NUBIC®
GLOBAL ENERGY

COMPANY PROFILE

We at Nubic introduce ourselves as one of the leading electrical equipment manufacturers in India. We are manufacturing entire range of household, industrial and commercial electrical products ranging from Switchgear, Wires & Cables, Fans, Modular Switches, Motors and other Domestic Appliances.

Nubic is the well known name in Electrical and Electronic industry in India, manufactruring products ranging from Building Circuit Protection, Industrial & Domestic Switchgears, Wire & Cables, Energy Meters, Fans, Luminaries and Modular Switches.

Nubic Group has emerged as the prefered choice for a discerning range of individual and industrial consumers both in India and abroad. The essence of its success liesin the expertise of a fine team of professionals, the strong relationship with associates, the ability to change quickly and efficiently and the vision to think ahead.

NUBIC®
GLOBAL ENERGY

MINIATURE CIRCUIT BREAKERS (MCBs)

MCB's or miniatura circuit breakers are electro mechanical devices which protect an electric circuit from an over current. The over current, in an electrical circuit, may result from short circuit, overload or faulty design.

An MCB is a better alternative to a fuse since it does not require replacement once an overload is detected. Unlike fuse, an MCB can be easily operated and thus offer improved operational safety and greater convenience without incurring large operating cost.

The surface of MCB has been designed in such a way that does not allow dust to settle on its surface. The MCB thus retains its new look for years. Miniature circuit breakers are used to protect lower current circuits and have the following specifications.

Rated Current Rating - Amperes Short circuit Breaking Current Rating-KiloAmperes (KA)- Operating Characteristics - 'B' or 'C' curves

CONSTRUCTION & FEATURES:

- Good Design
- In accordance with IS/IEC 60898-1
- Available in B & C curves
- Rated short circuit breaking capacity: 10000A(10kA)
- High speed and high breaking capacity mechanism
- Power loss values are much lower than the specified values of IS/IEC standard making in the most energy-efficient MCB
- Trip free mechanism
- No Line-Load bias
- Rapid action
- Provision for auxillary part attachment

ELECTRICAL ISOLATION SWITCH (ISOLATOR) SWITCHING DEVICES DISCONNECTORS

Circuit breaker always trip the circuit but open contact of breaker cannot be visible physically from outside of the breaker and that is why it is recommended not to touch any electrical circuit just by switching off the circuit breaker.

So for better safety there must be some arrangement so that one can see open condition of the section of the circuit before touching it. Isolator is a mechanical switch which isolates a part of circuit from system as and when required. Electrical isolator separate a part of the system from rest for safe maintenance works.

Isolator are used in electrical installation to make, carry and break circuit current, The isolator ensures that there will be no current at the load side even if impulse voltage appears when the isolator is off.

CONSTRUCTION & FEATURES:

- Can be used safety as in comer
- Heavy duty frame for the complete range
- Silver alloy contacts for weld free operations
- Low watt loss
- Utilization category AC22A
- Available in DP, TP and FP versions in 40A, 63A &100A ratings
- Confirm to IS/IEC 60947-3

RESIDUAL CURRENT OPERATED CIRCUIT BREAKERS (RCCBS/ELCBs)

RESIDUAL CURRENT PROTECTION DEVICES

The flow of current through electrical facilities always involves risk. Poorly insulated equipment, faulty wire & incorrect use of an electrical device cause currents to flow through the wrong path (i.e. through the insulation) to the earth. This current is called 'Leakage Current'. Earth leakage is an electrical hazard and is responsible for electrical shock and fire risk.

Earth leakage and its associated hazard can be prevented by Residual Current Circuit Breaker (RCCB), also popularly known as Earth Leakage Circuit breaker (ELCB).

Range-25A-40A-63A
Sensitivity-30mA, 100mA, 300mA
Execution
Double Pole (2P). Four Pole (4P)
specification
IS 12640 (Part-1), IEC EN-61008-1
Type-AC

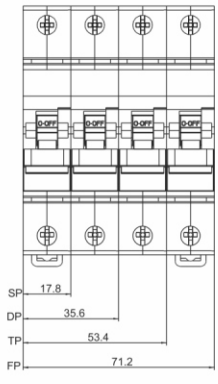

CONSTRUCTION & FEATURES:

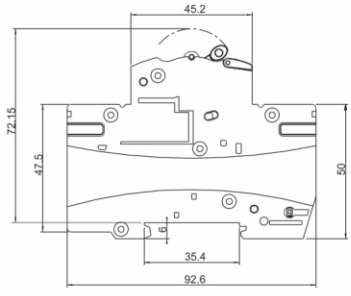

- Simple and Robust operating mechanism
- Test button for regular inspection
- Truly current operated-operation even at nominal voltage
- RCCBS/ELCBs are available in DP and FP versions from 25A to 63A rating with 30 mA, 100mAand 300 mA sensitivity
- Operates on Core Balance current Transformer(CBCT) principle
